

PRODUCT DATA SHEET

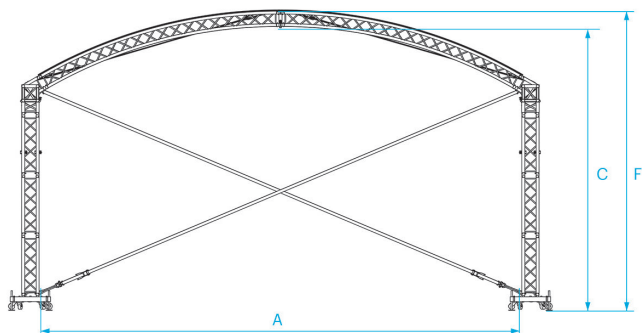

The Arc Roof is a fixed construction, based on three inward-curving trusses that are mounted to side masts. Special corners connect the arches to the main grid. Different configurations are made possible by simply changing the arches. The arched trusses have a keder profile on top for fitting the optional canopy.

Advantages

- Versatile application
- Easy to handle, quick setup
- Significant loading capacity
- Ideal for smaller events
- Extra options available

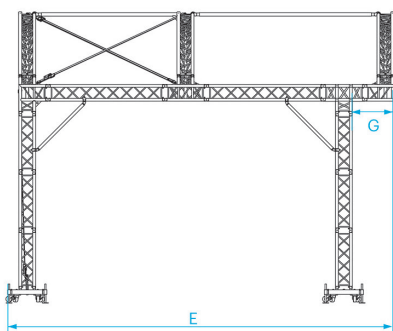

Front view - 6x4 m Arc
